Certified Mail No. 7005 1160 0000 1550 7152

Mr. Devin Downs, President
Tree Top Recycling, Inc.
8109 Star Pass Ridge Rd
Nampa, ID 83686

RE: Facility ID No. 777-00385, Tree Top Recycling, Inc., Boise
Final Tier II Operating Permit Letter

Dear Mr. Downs:

The Department of Environmental Quality (DEQ) is issuing Tier II Operating Permit No. T2-060001 for the wood recycling facility at Tree Top Recycling, Inc., located in Boise, Idaho, in accordance with IDAPA 58.01.01.400 through 406, *Rules for the Control of Air Pollution in Idaho (Rules)*.

The enclosed Tier II operating permit is based on the information contained in your permit application. Please note that this permit expires five years after the issuance date.

In accordance with IDAPA 58.01.01.407, DEQ has assessed the emissions for this permit and determined that a Tier II processing fee of \$500 will be due. A fee invoice will be sent to you from the DEQ fiscal office shortly.

A representative of the Boise Regional Office will contact you regarding a meeting with DEQ to discuss the permit terms and requirements. DEQ recommends the following representatives attend the meeting: your facility's plant manager, responsible official, environmental contact, and any operations staff responsible for day-to-day compliance with permit conditions.

Pursuant to IDAPA 58.01.23, you, as well as any other entity, may have the right to appeal this final agency action within 35 days of the date of this decision. However, prior to filing a petition for a contested case, I encourage you to call Bill Rogers at (208) 373-0502 or William.Rogers@deq.idaho.gov to address any questions or concerns you may have with the enclosed permit.

Sincerely,

Martin Bauer, Administrator
Air Quality Division

MB/NBD/bf/sd

Permit No. T2-060001

Enclosure

✂ -----

Please make checks payable to: Department of Environmental Quality. Please write your permit number on the check and remit the fee and this information to the following:

Idaho Department of Environmental Quality
Fiscal Office – Air Quality
1410 N. Hilton, Boise, ID 83706-1255

Amount Enclosed: \$ _____.

8. PERMIT AUTHORITY

This permit is issued according to the Rules for the Control of Air Pollution in Idaho, IDAPA 58.01.01.400, and pertains only to emissions of air contaminants regulated by the state of Idaho and to the sources specifically allowed to be operated by this permit.

This permit has been granted on the basis of design information presented in the application and the Idaho Department of Environmental Quality's (DEQ) technical analysis of the supplied information. Changes in design or equipment that result in any change in the nature or amount of emissions may be considered a modification. Modifications are subject to DEQ review in accordance with Section 58.01.01.200 of the Rules for the Control of Air Pollution in Idaho.

1. TIER II OPERATING PERMIT SCOPE

Purpose

- 1.1 This Tier II operating permit addresses fugitive dust emissions to ensure compliance with National Ambient Air Quality Standards relating to particulate matter of size 10 micrometers or less (PM₁₀).

Regulated Sources

- 1.2 Table 1.1 lists all sources of regulated emissions addressed in this permit.

Table 1.1 SUMMARY OF REGULATED SOURCES

Permit Section	Source Description	Emissions Control(s)
2.	All equipment with the potential to create fugitive dust	Fugitive dust Best Management Practices and reasonable control of fugitive dust

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

2. FACILITY-WIDE CONDITIONS

Table 2.1 contains a summary of requirements that apply generally to emissions units at the facility.

Table 2.1 APPLICABLE REQUIREMENTS SUMMARY

Permit Condition	Parameter	Applicable Requirements Reference	Monitoring and Recordkeeping Requirements
2.1	Visible Emissions	IDAPA 58.01.01.625	2.1, 2.8, 2.9, 2.10
2.2	Fugitive Dust	IDAPA 58.01.01.650-651	2.2, 2.8, 2.9, 2.10
2.3	Best Management Practices	IDAPA 58.01.01.650-651	2.2, 2.8, 2.9, 2.10
2.4	Fuel Oil Sulfur Content	IDAPA 58.01.01.728	2.4, 2.8, 2.9, 2.10
2.5	Open Burning	IDAPA 58.01.01.600-616	2.8, 2.9, 2.10
2.6	Odors	IDAPA 58.01.01.775-776	2.6, 2.8, 2.9, 2.10
2.7	Excess Emission	IDAPA 58.01.01.130-136	2.8, 2.9, 2.10

2.1 Visible Emissions

The permittee shall not discharge any air pollutant to the atmosphere which has greater than 20% opacity as determined by procedures contained in IDAPA 58.01.01.625, from any point of emission for a period or periods aggregating more than three minutes in any 60-minute period. These provisions shall not apply when the presence of uncombined water, NO_x, and/or chlorine gas is the only reason for the failure of the emission to comply with the requirements of this section.

The permittee shall conduct a weekly facility-wide inspection of potential sources of visible emissions, during daylight hours and under normal operating conditions. The visible emissions inspection shall consist of a see/no see evaluation for each potential source. If any visible emissions are present from any point of emission, the permittee shall either take appropriate corrective action as expeditiously as practicable or perform a Method 9 opacity test in accordance with the procedures outlined in IDAPA 58.01.01.625. A minimum of 30 observations shall be recorded when conducting the opacity test. If opacity is greater than 20% for a period or periods aggregating more than three minutes in any 60-minute period, the permittee shall take all necessary corrective action and report the exceedance in accordance with IDAPA 58.01.01.130-136. The permittee shall maintain records of the results of each visible emissions inspection and each opacity test when conducted. The records shall include, at a minimum, the date and results of each inspection and test and a description of the following: the permittee's assessment of the conditions existing at the time visible emissions are present (if observed), any corrective action taken in response to the visible emissions, and the date corrective action was taken.

2.2 Fugitive Dust

All reasonable precautions shall be taken to prevent PM from becoming airborne in accordance with IDAPA 58.01.01.650-651. In determining what is reasonable, consideration will be given to factors such as the proximity of dust-emitting operations to human habitations and/or activities and atmospheric conditions that might affect the movement of particulate matter. Some of the reasonable precautions include, but are not limited to, the following:

- Use, where practical, of water or chemicals for control of dust in the demolition of existing buildings or structures, construction operations, the grading of roads, or the clearing of lands.
- Application, where practical, of asphalt, oil, water, or suitable chemicals to, or covering of, dirt roads, material stockpiles, and other surfaces that can create dust.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

- Installation and use, where practical, of hoods, fans, and fabric filters or equivalent systems to enclose and vent the handling of dusty materials. Adequate containment methods should be employed during sandblasting or other operations.
- Covering, where practical, of open-bodied trucks transporting materials likely to give rise to airborne dust.
- Paving of roadways and their maintenance in a clean condition, where practical.
- Prompt removal of earth or other stored material from streets, where practical.

The permittee shall monitor and maintain records of the frequency and the method(s) used (i.e., water, chemical dust suppressants, etc.) to reasonably control fugitive dust emissions.

The permittee shall conduct a weekly facility-wide inspection of potential sources of fugitive emissions, during daylight hours and under normal operating conditions, to ensure that the methods used to reasonably control fugitive emissions are effective. If fugitive emissions are not being reasonably controlled, the permittee shall take corrective action as expeditiously as practicable. The permittee shall maintain records of the results of each fugitive emissions inspection. The records shall include, at a minimum, the date of each inspection and a description of the following: the permittee's assessment of the conditions existing at the time fugitive emissions were present (if observed), any corrective action taken in response to the fugitive emissions, and the date the corrective action was taken.

The permittee shall maintain records of all fugitive dust complaints received. The permittee shall take appropriate corrective action as expeditiously as practicable after receipt of a valid complaint. The records shall include, at a minimum, the date that each complaint was received and a description of the following: the complaint, the permittee's assessment of the validity of the complaint, any corrective action taken, and the date the corrective action was taken.

Each time a fugitive dust trigger as defined by Permit Condition 2.3 is activated, the permittee shall monitor and record the trigger, document the date and time observed, the operating conditions, the control strategy or strategies used, and the results achieved from the use of that control strategy or strategies.

2.3 Best Management Practices

Vehicle Track-out

Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from track-out onto paved public roadways include, but are not limited to, the following:

- Visible deposition of mud, dirt, or similar debris on the surface of a paved public roadway.
- Any visible fugitive emissions from vehicle traffic on an affected paved public roadway for a period or periods aggregating more than one minute in any sixty minute period.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

- Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the permittee for merit. If the permittee determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. DEQ may review records and investigate citizen complaints as appropriate. If DEQ finds that a complaint has merit, it may determine additional control measures are required.

Strategies to control fugitive dust emissions from track-out onto paved public roadways include, but are not limited to, the following:

- Prompt removal of mud, dirt, or similar debris from the affected surface of the paved public roadway.
- Water flush, and/or vacuum sweep of the affected surface of the paved public roadway. Runoff shall be controlled, so it does not saturate the surface of the adjacent unpaved haul road and enhance track-out. If runoff is not, or cannot be controlled, gravel shall be applied to the surface of the adjacent unpaved haul road over an area sufficient to control track-out.
- Application of gravel to the surface of the adjacent unpaved haul road. The area of application shall be sufficient to control track-out.
- Application of an environmentally safe chemical soil stabilizer or chemical dust suppressant to the surface of the adjacent unpaved haul road. The area of application shall be sufficient to control track-out.
- Other control strategy or strategies as approved by DEQ.

Unpaved Haul Roads

Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from unpaved haul roads include, but are not limited to, the following:

- Any visible fugitive emissions from vehicle traffic on an affected paved public roadway for a period or periods aggregating more than one minute in any 60 minute period.
- Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the permittee for merit. If the permittee determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. DEQ may review records and investigate citizen complaints as appropriate. If DEQ finds that a complaint has merit, it may determine additional control measures are required.

Strategies to control fugitive dust emissions from unpaved haul roads include, but are not limited to the following:

- Limiting vehicle traffic on unpaved haul roads.
- Limiting vehicle speeds on unpaved haul roads. If a speed limit is imposed, signs shall be posted along the haul routes which clearly indicate the speed limit. Signs shall be placed so they are visible entering and leaving the site of operations.
- Applying water to the surface of the unpaved haul road. Runoff shall be controlled so it does not saturate the surface of the unpaved haul road and enhance track-out. If runoff is not or cannot be controlled, gravel shall be applied to the surface of the unpaved haul road over an area sufficient to control track-out.
- Applying gravel to the surface of the unpaved haul road.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

- Applying an environmentally safe chemical soil stabilizer or chemical dust suppressant to the surface of the unpaved haul road.
- Other controls strategy or strategies as approved by DEQ.

Transfer Points, Screening Operations, and Stacks and Vents

Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from transfer points, belts conveyors, bucket elevators, screening operations, conveying systems, capture systems, and building vents include, but are not limited to, the following:

- Any visible emissions from any capture system stack or transfer point on a belt conveyor, conveyor system, bucket elevator, or screening operation for a period or periods aggregating more than one minute in any 60 minute period.
- Any visible emissions from any building vent for any transfer point on a belt conveyor, conveyor system, bucket elevator, or screening operation located within a building for a period or periods aggregating more than one minute in any 60 minute period.
- Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the permittee for merit. If the permittee determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. DEQ may review records and investigate citizen complaints as appropriate. If DEQ finds that a complaint has merit, it may determine additional control measures are required.

Strategies to control fugitive dust emissions for transfer points, belt conveyors, bucket elevators, screening operations, conveying systems, capture systems, and building vents include, but are not limited to, the following:

- Limiting drop heights of materials such that a homogeneous flow of material is maintained.
- Installing, operating, and maintaining water supply bars to control fugitive dust emissions at transfer points on belt conveyors, conveyor systems, bucket elevators, and screening operations as necessary.
- Other control strategy or strategies as approved by DEQ.

Crushers and Grinding Mills

Triggers that require initiation of a strategy or strategies to control fugitive dust emissions from any crusher, grinding mill, building vent, capture system stack for NSPS processing plants shall include, but not be limited to, the following:

- Any visible emissions from any crusher or grinding mill at which a capture system is not used for any period or periods of greater than one minute during any 60 minute period.
- Any visible emissions from any crusher or grinding mill located within a building at which a capture system is not used for any period or periods of greater than one minute during any 60 minute period from any building vent.
- Any visible emissions from any capture stack for any period or periods of greater than one minute during any 60 minute period.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

- Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the permittee for merit. If the permittee determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. DEQ may review records and investigate citizen complaints as appropriate. If DEQ finds that a complaint has merit, it may determine additional control measures are required.

Strategies for the control of fugitive emissions from any crusher, grinding mill, building vent, or capture system stack include, but are not be limited to, the following:

- Limiting drop heights of materials such that a homogeneous flow of material is maintained.
- Installing, operating, and maintaining water supply bars to control fugitive dust emissions at crusher drop points as necessary.
- Other control strategy or strategies as approved by DEQ.

Stockpiles

Triggers that require immediate initiation of a strategy or strategies to control fugitive dust emissions from stockpiles, include but not limited to, the following:

- Any visible fugitive emission from wind erosion of any stockpile for a period or periods aggregating more than one minute in any 60 minute period.
- Citizen complaints of failure to reasonably control fugitive dust shall be expeditiously evaluated by the permittee for merit. If the permittee determines the complaint has merit, the progressive strategy shall be expeditiously employed to reasonably control fugitive dust. DEQ may review records and investigate citizen complaints as appropriate. If DEQ finds that a complaint has merit, it may determine additional control measures are required.

Strategies for control of fugitive emission from stockpiles include, but are not limited to, the following:

- Limiting the height of the stockpiles.
- Limiting the disturbance of the stockpiles.
- Applying water onto the surface of the stockpiles.
- Other control strategy or strategies as approved by DEQ.

2.4 Fuel Oil Sulfur Content

The permittee shall not sell, distribute, use, or make available for use any distillate fuel oil containing more than the following percentages of sulfur:

- ASTM Grade 1 fuel oil - 0.3% by weight.
- ASTM Grade 2 fuel oil - 0.5% by weight.
- ASTM Grades 4, 5, and 6 fuel oil – 1.75% by weight.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

The permittee shall monitor and record the fuel oil sulfur content for each shipment of fuel oil received, or obtain certification of the fuel oil sulfur content for each shipment of fuel oil received from the fuel oil supplier to demonstrate compliance with Permit Condition 2.4. Records of this information shall remain onsite for the most recent two-year period and shall be made available to DEQ representatives upon request.

2.5 Open Burning

The permittee shall comply with the requirements of the Rules for Control of Open Burning, IDAPA 58.01.01.600-616.

2.6 Odors

The permittee shall not allow, suffer, cause, or permit the emission of odorous gases, liquids, or solids to the atmosphere in such quantities as to cause air pollution.

The permittee shall maintain records of all odor complaints received. If the complaint has merit, the permittee shall take appropriate corrective action as expeditiously as practicable. The records shall include, at a minimum, the date that each complaint was received and a description of the following: the complaint, the permittee's assessment of the validity of the complaint, any corrective action taken, and the date the corrective action was taken.

2.7 Excess Emissions

The permittee shall comply with the procedures and requirements of IDAPA 58.01.01.130-136 for excess emissions due to startup, shutdown, scheduled maintenance, safety measures, upsets and breakdowns.

2.8 Monitoring and Recordkeeping

The permittee shall maintain sufficient records to ensure compliance with all of the terms and conditions of this operating permit. Records of monitoring information shall include, but not be limited to, the following: (a) the dates, places, and times of sampling or measurements; (b) the dates analyses were performed; (c) the company or entity that performed the analyses; (d) the analytical techniques or methods used; (e) the results of such analyses; and (f) the operating conditions existing at the time of sampling or measurement. All monitoring records and support information shall be retained for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Supporting information includes, but is not limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by this permit. All records required to be maintained by this permit shall be made available in either hard copy or electronic format to DEQ representatives upon request.

			Date Expires:	August 24, 2011

2.9 Reports and Certifications

Any reporting required by this permit, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, notifications of intent to test, testing reports, or compliance certifications, shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete. Any reporting required by this permit, with the exception of a Portable Equipment Registration and Relocation form, shall be submitted to the following address:

Air Quality Permit Compliance
Department of Environmental Quality
Boise Regional Office
1445 N Orchard St
Boise, ID 83706-2239
Phone: (208) 373-0550 Fax: (208) 373-0287

2.10 Obligation to Comply

Receiving a Tier II operating permit shall not relieve any owner or operator of the responsibility to comply with all applicable local, state, and federal rules and regulations.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

3. TIER II PERMIT GENERAL PROVISIONS

General Compliance

1. The permittee has a continuing duty to comply with all terms and conditions of this permit. All emissions authorized herein shall be consistent with the terms and conditions of this permit and the Rules for the Control of Air Pollution in Idaho. The emissions of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code §39-101, et seq.

[Idaho Code §39-101, et seq.]

2. The permittee shall at all times (except as provided in the Rules for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable Idaho laws for the control of air pollution.

[IDAPA 58.01.01.405, 5/1/94]

3. Nothing in this permit is intended to relieve or exempt the permittee from the responsibility to comply with all applicable local, state, or federal statutes, rules and regulations.

[IDAPA 58.01.01.406, 5/1/94]

Inspection and Entry

4. Upon presentation of credentials, the permittee shall allow DEQ or an authorized representative of DEQ to do the following:
 - a. Enter upon the permittee's premises where an emissions source is located or emissions related activity is conducted, or where records are kept under conditions of this permit;
 - b. Have access to and copy, at reasonable times, any records that are kept under the conditions of this permit;
 - c. Inspect at reasonable times any facilities, equipment (including monitoring and air pollution control equipment), practices, or operations regulated or required under this permit; and
 - d. As authorized by the Idaho Environmental Protection and Health Act, sample or monitor, at reasonable times, substances or parameters for the purpose of determining or ensuring compliance with this permit or applicable requirements.

[Idaho Code §39-108]

Performance Testing

5. If performance testing (air emissions source test) is required by this permit, the permittee shall provide notice of intent to test to DEQ at least 15 days prior to the scheduled test date or shorter time period as approved by DEQ. DEQ may, at its option, have an observer present at any emissions tests conducted on a source. DEQ requests that such testing not be performed on weekends or state holidays.

AIR QUALITY TIER II OPERATING PERMIT NUMBER: T2-060001

Permittee:	Tree Top Recycling, Inc.	Facility ID No. 777-00385	Date Issued:	August 24, 2006
Location:	Boise, ID 83709		Date Modified/Amended:	
			Date Expires:	August 24, 2011

All performance testing shall be conducted in accordance with the procedures in IDAPA 58.01.01.157. Without prior DEQ approval, any alternative testing is conducted solely at the permittee's risk. If the permittee fails to obtain prior written approval by DEQ for any testing deviations, DEQ may determine that the testing does not satisfy the testing requirements. Therefore, at least 30 days prior to conducting any performance test, the permittee is encouraged to submit a performance test protocol to DEQ for approval. The written protocol shall include a description of the test method(s) to be used, an explanation of any or unusual circumstances regarding the proposed test, and the proposed test schedule for conducting and reporting the test.

Within 30 days following the date in which a performance test required by this permit is concluded, the permittee shall submit to DEQ a performance test report. The written report shall include a description of the process, identification of the test method(s) used, equipment used, all process operating data collected during the test period, and test results, as well as raw test data and associated documentation, including any approved test protocol.

[IDAPA 58.01.01.157, 4/5/00]

Monitoring and Recordkeeping

6. The permittee shall maintain sufficient records to ensure compliance with all of the terms and conditions of this permit. Records of monitoring information shall include, but not be limited to the following: (a) the date, place, and times of sampling or measurements; (b) the date analyses were performed; (c) the company or entity that performed the analyses; (d) the analytical techniques or methods used; (e) the results of such analyses; and (f) the operating conditions existing at the time of sampling or measurement. All monitoring records and support information shall be retained for a period of at least five years from the date of the monitoring sample, measurement, report, or application. Supporting information includes, but is not limited to, all calibration and maintenance records and all original strip-chart recordings for continuous monitoring instrumentation and copies of all reports required by this permit. All records required to be maintained by this permit shall be made available in either hard copy or electronic format to DEQ representatives upon request.

[IDAPA 58.01.01.405, 5/1/94]

Excess Emissions

7. The permittee shall comply with the procedures and requirements of IDAPA 58.01.01.130-136 for excess emissions due to startup, shutdown, scheduled maintenance, safety measures, upsets and breakdowns.

[IDAPA 58.01.01.130-136, 4/5/00]

Certification

8. All documents submitted to DEQ, including, but not limited to, records, monitoring data, supporting information, requests for confidential treatment, testing reports, or compliance certification shall contain a certification by a responsible official. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document(s) are true, accurate, and complete.

[IDAPA 58.01.01.123, 5/1/94]

			Date Expires:	August 24, 2011

False Statements

9. No person shall knowingly make any false statement, representation, or certification in any form, notice, or report required under this permit, or any applicable rule or order in force pursuant thereto.
[IDAPA 58.01.01.125, 3/23/98]

Tampering

10. No person shall knowingly render inaccurate any monitoring device or method required under this permit or any applicable rule or order in force pursuant thereto.
[IDAPA 58.01.01.126, 3/23/98]

Expiration and Renewal

11. This permit shall be renewable on the expiration date, provided the permittee submits an application for renewal to the Department and continues to meet all terms and conditions contained in the permit. The expiration of this permit will not affect the operation of the stationary source or facility during the administrative procedure period associated with the permit renewal process.
[IDAPA 58.01.01.209.04, 7/1/02]

Transferability

12. This permit is transferable in accordance with procedures listed in IDAPA 58.01.01.404.05.
[IDAPA 58.01.01.404.05, 4/11/06]

Severability

13. The provisions of this permit are severable, and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.
