

**Draft Agenda**  
**Pend Oreille Tributary Subgroup (Idaho)**  
**Sandpoint Federal Building**  
**Thursday, October 26, 2006**  
**9 AM – Noon**

- Introductions and Review Agenda
- Interaction with Pend Oreille River mainstem Watershed Advisory Group
- Review of Impaired Water Bodies in the Subbasin
  - Existing TMDLs
  - New TMDLs to be developed
    - Sediment
    - Temperature
    - Nutrients
    - Other
- Summary of Stressor Identification Reports completed for Impaired Water Bodies Identified as an “unknown” pollutant source and recommendations
  - Pack River Watershed
    - Upper Pack River (ID170214PN041\_02)
    - McCormick Creek (ID170214PN042\_02)
    - Hellroaring Creek (ID170214PN044\_02)
    - Gold Creek (ID170214PN034\_02)
    - Rapid Lightning Creek (ID170214PN033\_03)
  - Sand Creek (ID170214PN049\_03)
- Introduction to Proposed Sediment Model to be used. Water bodies currently identified for sediment TMDLs include:
  - Upper Pack River
  - Hellroaring Creek
  - Gold Creek (Tributary to Pack River)
  - Rapid Lightning Creek
  - North Gold Creek (Tributary to Gold Creek that drains into Lake Pend Oreille)
  - Sand Creek (Tributary to Lake Pend Oreille)
  - Schweitzer Creek
- Next meeting and options for participation

A list of all Pend Oreille tributaries to be discussed is available on the DEQ web-site:
