

Lower Boise River TP TMDL **Draft** Adjusted Timeline - April 3, 2013

- This timeline is an estimate; the time and order necessary to complete each task are subject to change depending actual circumstances.
- Each identified task will include numerous associated sub-tasks to be completed.
- DEQ will continue and increase its consultation and coordination efforts with the LBWC, TAC, EPA, USGS, and other stakeholders in order to most efficiently, effectively, and cooperatively develop the TMDL.
- DEQ will fully consider input from the LBWC, TAC, EPA, USGS, and other stakeholders throughout the development of the TMDL.
- DEQ will provide the LBWC, TAC, EPA, USGS, and other stakeholders 30 days to review the draft TMDL and provide DEQ with subsequent feedback.
- DEQ will fully consider all input and feedback for the draft and final TMDL provided by the LBWC, TAC, EPA, USGS, and other stakeholders.
- DEQ strives to produce a TMDL that is fully supported by the LBWC.
 - However, if the LBWC is not in agreement with the TMDL, their position and basis for it will be documented in the public notice of availability of the TMDL for review. If the LBWC still disagrees with the TMDL after public comments have been considered and incorporated, DEQ will incorporate the LBWC’s dissenting opinion in the TMDL that is submitted to EPA.
